

2x3 standard curved Pop-up System

When Designing graphics for the Metaplane One pop up system it may be useful to bear in mind the following :

1. The graphic image is made up of several panels which tile together Whilst the processes used to create panels are highly accurate it can look untidy to have objects especially letters cut in two by a join.

2. The end panels wrap from the front to the back of the system. The extreme left and right areas of a design will not be visible from the front. See diagram right. a

All 4 panels for this system are 665 mm x 2185 mm
